

**DEPARTMENT OF AUDIOLOGY & SPEECH-LANGUAGE PATHOLOGY**  
College of Health and Public Service

Hello,

The University of North Texas Department of Audiology and Speech-Language Pathology is conducting an online confidential survey to examine sports participation in children with hearing loss. We want to collect confidential information from parents/caregivers of children with hearing loss to examine factors that may influence participation and nonparticipation in organized sports. This information will help us to identify ways to better support families of children with hearing loss who are interested in sports participation. The survey will take approximately 5-10 minutes, and participants will not be compensated for completing the survey.

For more information about this research study, please contact the principal investigator, Erin Schafer, Ph.D., CCC/A, at (940) 369-7433 or [Erin.Schafer@unt.edu](mailto:Erin.Schafer@unt.edu)
